

MEMORANDUM FOR RECORD

SUBJECT: Asbestos in Fort Leonard Wood Family Housing

1. The following information is provided concerning the presence of asbestos containing materials (ACM) in the housing units on Fort Leonard Wood.
2. A full assessment for the presence of ACM in Fort Leonard Wood housing units has not been conducted. However, units on the inventory that have been refurbished are should have had ACM removed or encapsulated. Units that have not been updated are assumed to potentially contain ACM in floor tile, mastic, plumbing/electrical insulation and other areas commonly containing ACM. Prior to renovation, these units will require a survey to identify the location of ACM.
3. POC: Ms. Wendy White, DPW-EE, 573/596-0882.
